TITLE : SYNCHRONOUS PAGE DISPLAYING
METHOD FOR PLURAL WWW
BROWSERS AND RECORDING
MEDIUM RECORDED WITH PROGRAM
FOR THE SAME

ABSTRACT : PROBLEM TO BE SOLVED: To enable WWW browsers of plural clients to display pages synchronously.

SOLUTION: Preparatory pages (pages 1 and 2) for page synchronizing operation and CGI software (CGIs 1 and 2) are added to a server 3. A client 1 which switches pages actuates the CGI 1 on the server and receives the page from the CGI 1 to wait for a page while connected to a WWW sever. The CGI 1 once informed of page switching information from the CGI 2 reads in this page and sends it to the client 1. A client 2 which switches pages designates page switching with a parameter and actuates the CGI 2. The CGI 2 reads in this page and informs the CGI 1 of the page switching information while sending it to the client 2.
